Vizianagaram, Andhra Pradesh

Profile Summary

Backend-focused Computer Science Engineering student with experience in designing scalable systems and microservices using Java, Spring Boot, and Spring Cloud. Proficient in REST API development, API integration, authentication (JWT, OAuth2), and distributed systems. Strong foundation in system design, database optimization, and software development lifecycle.

Internship

Java Full Stack Developer Intern – Vayvora Technologies Private Limited 2026 – Present

- Engineered backend services for PaiseWise, reducing API response time by 35% through performance optimization.
- Designed and deployed 10+ REST APIs using Spring Boot and microservices architecture, supporting scalable backend operations.
- Implemented secure authentication and authorization using Spring Security, JWT, and BCrypt, reducing unauthorized access risks by 40%.
- Integrated Spring Cloud Gateway and Netflix Eureka for service discovery, improving system availability and fault tolerance by 20%.
- Applied database-per-service architecture using PostgreSQL and H2, improving data isolation and scalability across services.
- Collaborated in Agile teams of 5+ developers using Git, reducing merge conflicts and improving deployment cycles.

Education

Lendi Institute of Engineering and Technology 2023 – 2027
B.Tech in Computer Science and Engineering – CGPA: 9.3/10

NRI Junior College, Vizianagaram 2021 – 2023
Intermediate (MPC) – 95.5%

BPMMC High School, Vizianagaram 2020 – 2021
10th Standard (SSC) – 93%

Projects

Online Project Resource Management System (OPRM)

- Developed a full-stack application using Java, Spring Boot, and MySQL to manage 100+ academic projects.
- Built REST APIs for project tracking and recommendation systems, reducing manual coordination effort by 50%.
- Applied TF-IDF and cosine similarity algorithms to improve matching efficiency and accuracy.

Sunday School Management System

- Engineered backend services using Spring Boot and MySQL to manage 200+ student records.
- Designed RESTful APIs and optimized SQL queries, improving data retrieval performance by 30%.

SmartWaste – AI Waste Classification System

- Developed an AI-based classification system achieving 85%+ accuracy in waste detection.
- Integrated machine learning models with backend APIs for real-time predictions.
- Designed database systems to handle 1000+ records for analysis and model improvement.

Skills

- Programming: Java, Python, C, C++, JavaScript
- Frontend: React.js, HTML5, CSS3, Thymeleaf
- Backend: Spring Boot, Microservices, REST APIs, Hibernate, Spring Security
- Databases: MySQL, PostgreSQL, SQL Optimization, MongoDB
- Tools: Git, GitHub, Maven, IntelliJ IDEA, Eclipse, VS Code
- Concepts: Data Structures, Algorithms, OOP, DBMS, Operating Systems
- Technologies: Distributed Systems, API Development, Scalable Systems
- Security: JWT, OAuth2, Role-Based Access Control

Certifications

- ServiceNow Certified System Administrator (CSA) Jul 2026
- EduSkills – Prompt Engineering for AI 2026
- EduSkills – Java Full Stack Development 2025
- Versant English Communication Certification 2024

Achievements

PR & Outreach Lead – GeeksforGeeks Campus Mantri Program 2025 – 2026

- Organized 5+ technical events for 300+ students, increasing community engagement and participation.
- Increased coding participation by 30% through targeted campaigns and structured outreach programs.
- Led a team of 10+ members, improving coordination efficiency and reducing event execution time by 20%.
